

Carbon Footprint Targets

Use double sided photocopying as far as possible

Print only in black and white except for exceptional circumstances

Keep a log of photocopying

Sunday morning heating timer to be set from approximately 8:30 a.m. to 11:00 a.m.

Place notices by light switches to remind users to switch off and only use if absolutely necessary

Recycling at Church events – Eco Group to organise this by the use of separate bags for: food waste, glass, hard plastics and cans, paper, general land fill

Cleaning products – all products to be eco friendly once existing products have been used.

Conduct annual travel and life style surveys to raise awareness and encourage the reduction of carbon emissions

Consider using recycled paper for anything other than the photocopier.

Once the annexe has been built, give due consideration to planting trees in appropriate positions to replace as many of those as possible which had been felled.
